Step 1: Install package

```
if (!require(devtools)){ install.packages('devtools')}

## Loading required package: devtools
## Loading required package: usethis
if (!require(pgxRpi)){ devtools::install_github('progenetix/pgxRpi')}

## Loading required package: pgxRpi
library(pgxRpi)
```

Step2: Search esophageal adenocarcinoma NCIt code

Step3: Access the CNV frequency data from samples with esophageal adenocarcinoma

```
freq <- pgxLoader(type='frequency', output='pgxseg',filters='NCIT:C9245', codematches=T)
```

The retrieved data is an object containing two slots meta and data.

The meta slot looks like this:

```
freq$meta
```

##	code	label	sample_count
## 1	NCIT:C9245	Invasive Breast Carcinoma	3796
## 2	total		3796

The data slot includes two matrices.

```
names(freq$data)
```

```
## [1] "NCIT:C9245" "total"
```

The frequency matrix looks like this

```
head(freq$data$`NCIT:C4025`)
```

```
## NULL
```

Dimension of this matrix

```
dim(freq$data$`NCIT:C4025`)
```

```
## NULL
```

Step4: Visualize data

By genome

```
pgxFreqplot(freq)
```

By chromosome

```
for (x in 1:22){  
  pgxFreqplot(freq,chrom = x)  
}
```

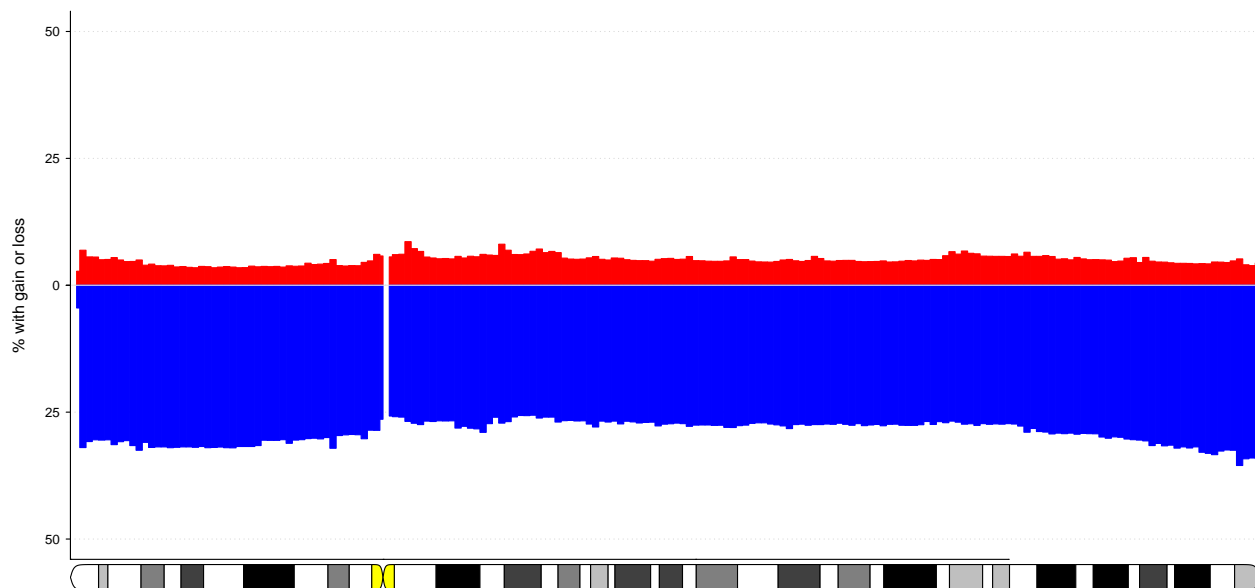

NCIT:C9245: Invasive Breast Carcinoma (3796 samples)
Chromosome 1

NCIT:C9245: Invasive Breast Carcinoma (3796 samples)
Chromosome 2

NCIT:C9245: Invasive Breast Carcinoma (3796 samples)
Chromosome 3

NCIT:C9245: Invasive Breast Carcinoma (3796 samples)
Chromosome 5

NCIT:C9245: Invasive Breast Carcinoma (3796 samples)
Chromosome 6

NCIT:C9245: Invasive Breast Carcinoma (3796 samples)
Chromosome 7

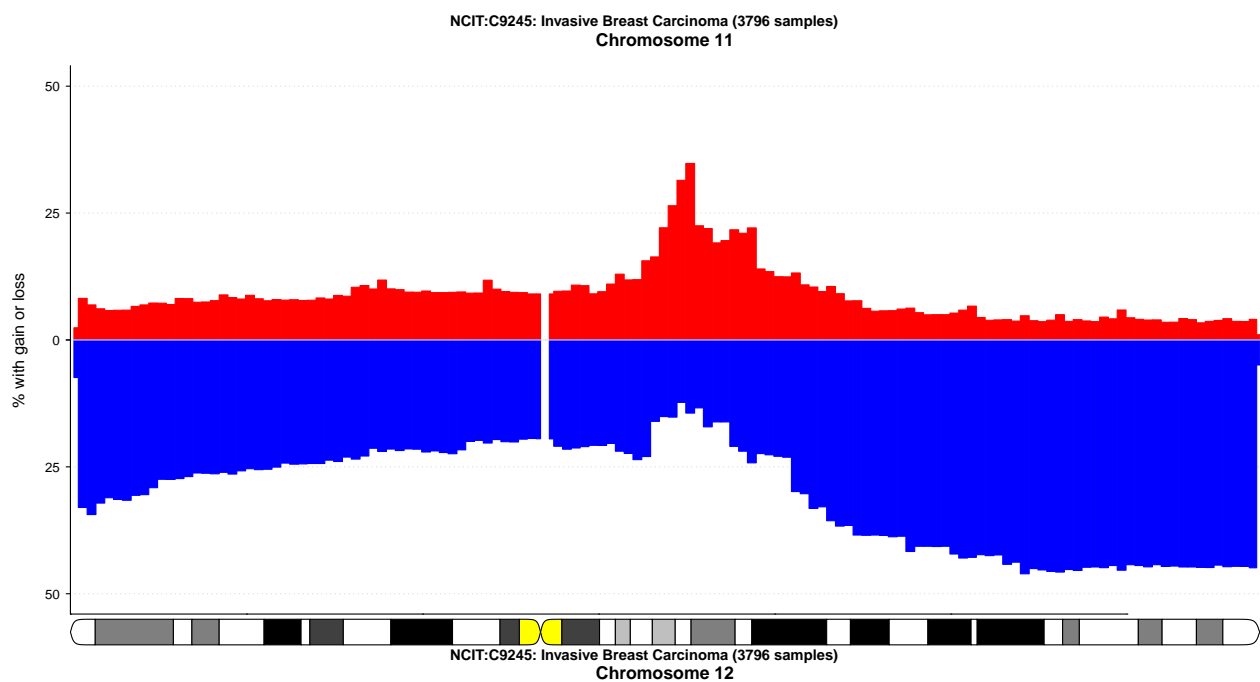

NCIT:C9245: Invasive Breast Carcinoma (3796 samples)
Chromosome 8

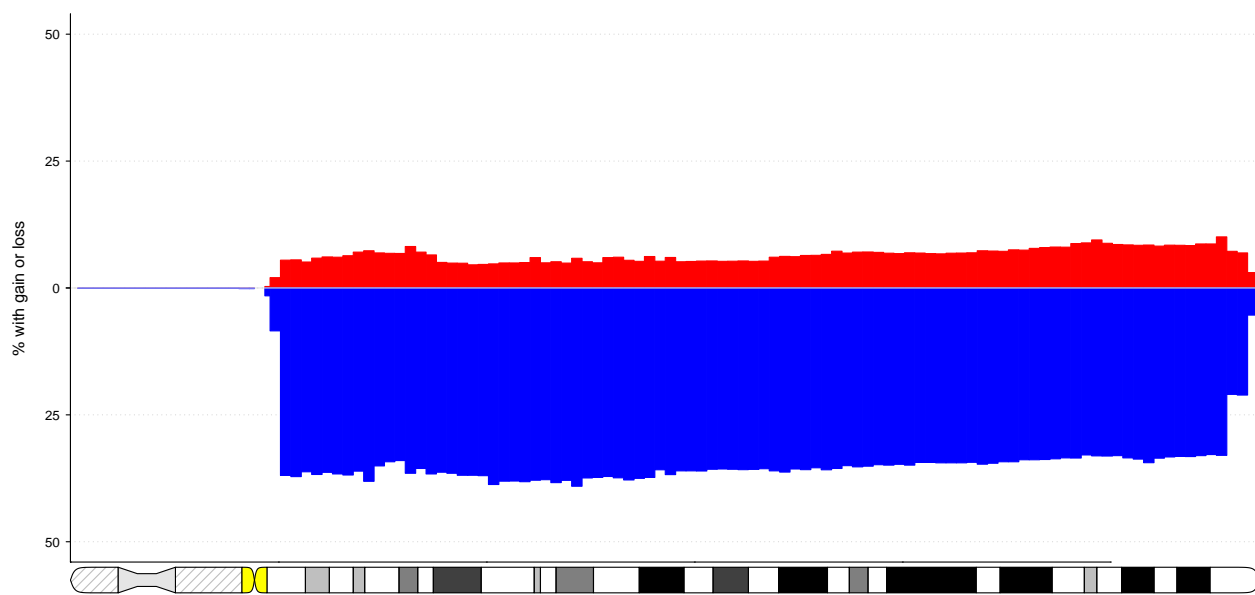

NCIT:C9245: Invasive Breast Carcinoma (3796 samples)
Chromosome 9

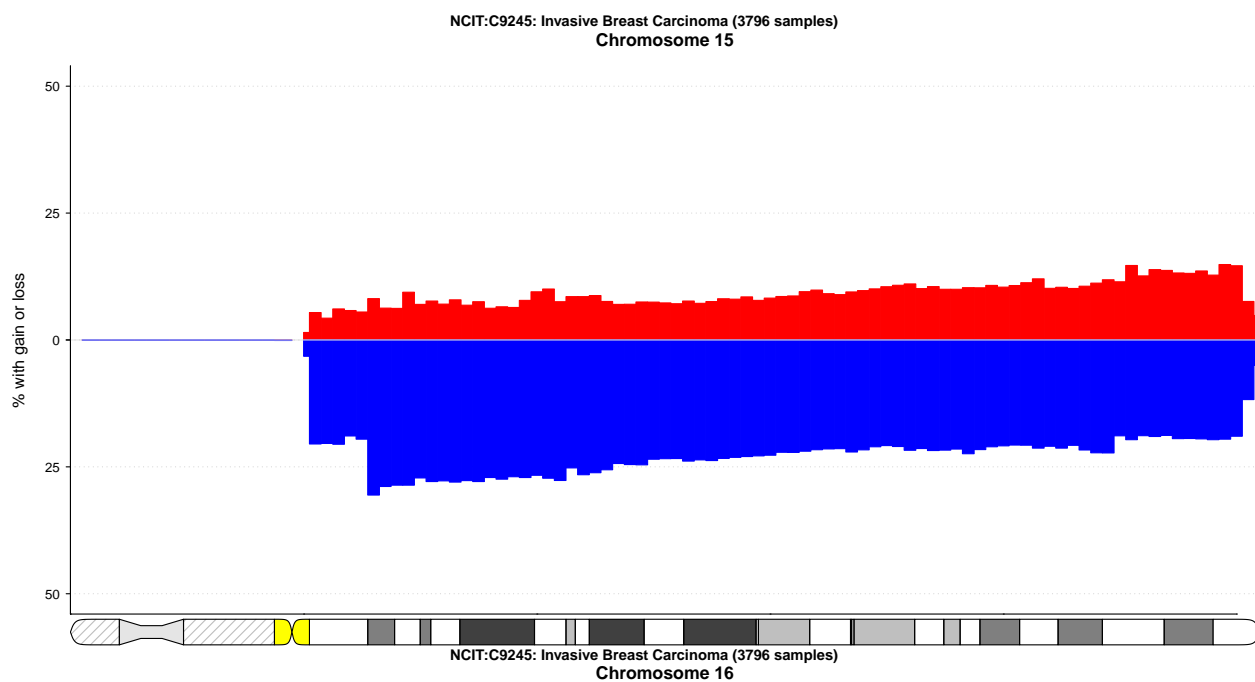

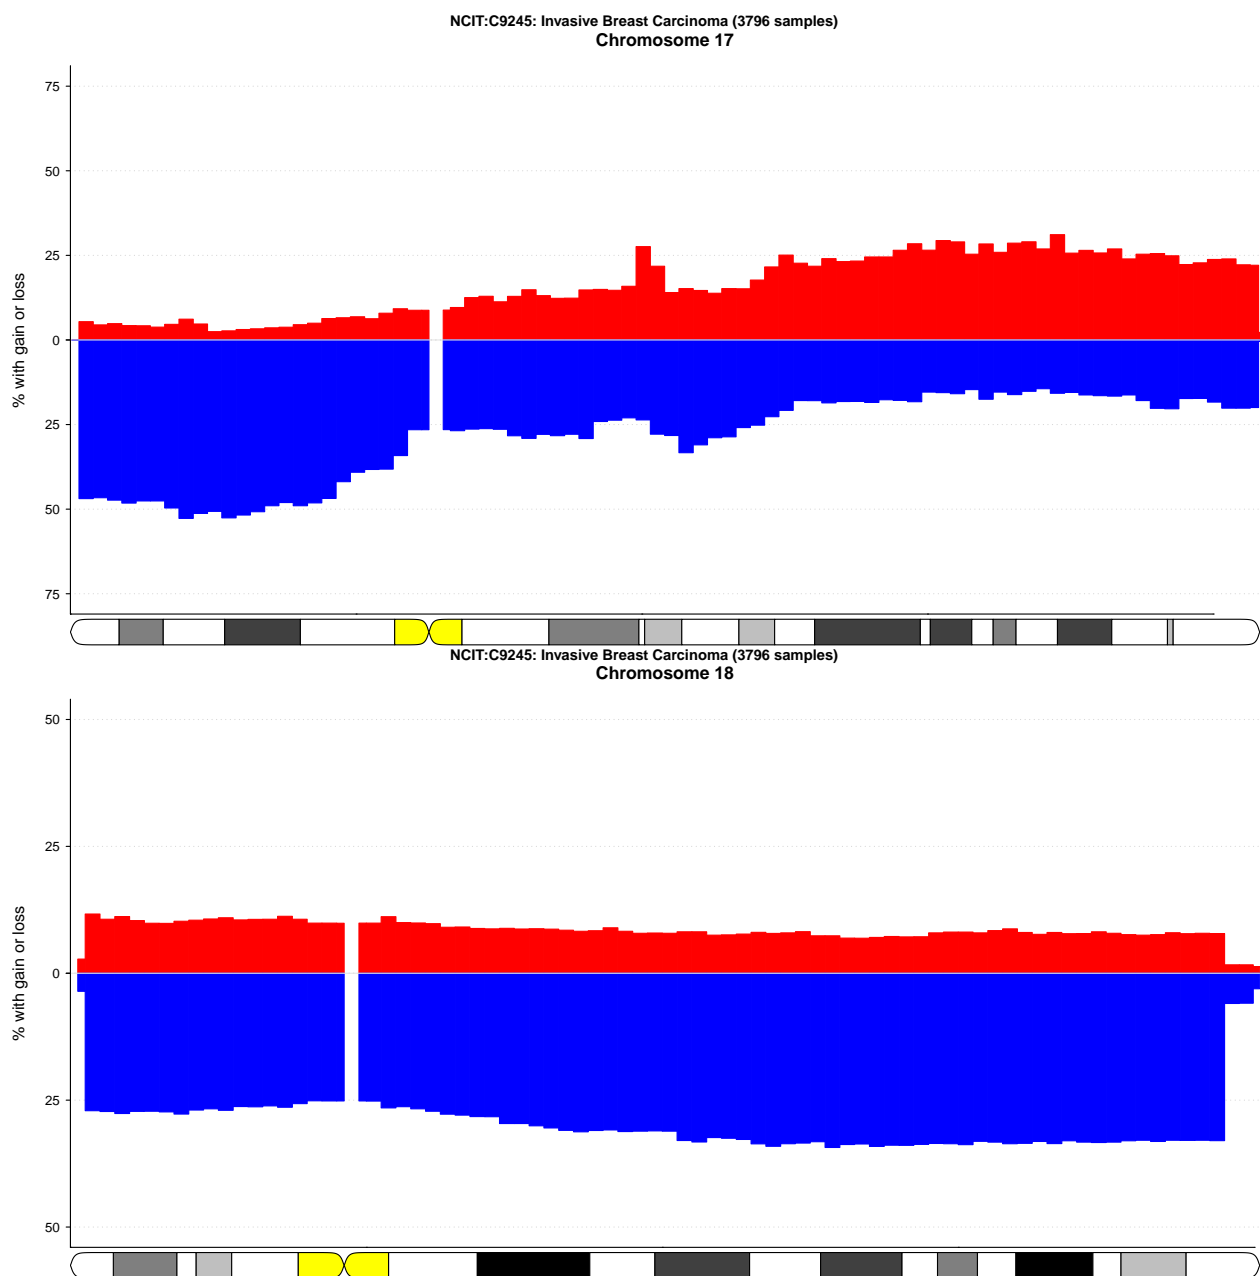

NCIT:C9245: Invasive Breast Carcinoma (3796 samples)
Chromosome 13

NCIT:C9245: Invasive Breast Carcinoma (3796 samples)
Chromosome 14

NCIT:C9245: Invasive Breast Carcinoma (3796 samples)
Chromosome 19

NCIT:C9245: Invasive Breast Carcinoma (3796 samples)
Chromosome 20

Step5: Analyse the data

According the plot, we can see frequent gains on chromosome 1q, 3q, 5p, 8q, 16p, 20q and frequent losses on chromosome 1p, 3p, 8p, 10q, 11q, 16q, 17p, 19p

There is literature where the findings are consistent with 1q,5q,16p,20q-gain and 11q,16q-loss.
